MARTEAU & CO

CONDITION REPORT

The following describes the condition of the watch below, as it was when the watch was included in the catalogue: The Encore

Lot 19

Andersen Genève - Communication

Condition : An exceptional example, this early “first generation” Communication in yellow gold shows little signs of wear, as evidenced by the lovely superficial patina that has developed over time. The case and the watch’s distinctive lugs are in great condition. The caseback’s original brushed surface is preserved thanks to a protective transparent sticker. The dial and hands are very well preserved. The movement and worldtime function are in excellent condition and running at time of cataloging.

The condition and relative wear of the watch are faithfully represented in the photographs provided. We invite interested collectors to reach out to info@marteauandco.com with any questions or to request further images.
